Subject Index Volume 61

Academic programs
Sixth Annual Report on the international status of engineering geology — Year 2000 Encompassing hydrogeology, environmental geology and the applied geosciences 1
Acoustic emission
Acoustic emission investigation of microcrack generation at geological boundaries 181
Analytical hierarchy process (AHP)
GIS-based geo-environmental evaluation for urban land-use planning: a case study 257
Anhydrite
Acoustic emission investigation of microcrack generation at geological boundaries 181
Anhydritklippen
Geological and tectonic investigations in the former Morsleben salt mine (Germany) as a basis for the safety assessment of a radioactive waste repository 83
Arno River, Italy
Failure mechanisms and pore water pressure conditions: analysis of a riverbank along the Arno River (Central Italy) 221
Äspö HRL
Stress control of hydraulic conductivity in fracture-saturated Swedish bedrock 145

Barrier
Geomechanical stability and integrity of waste disposal mines in salt structures 155
Block faulting
Moredalen — a canyon in the Fennoscandian Shield and its implication on site selection for radioactive waste disposal in south-eastern Sweden 99
Borehole seismics
Seismic investigation of the Excavation damaged zone in Opalinus Clay 189
Breccia
Process of slip-surface development and formation of slip-surface clay in landslides in Tertiary volcanic rocks, Japan 199
British Columbia
Dynamics of the 1984 rock avalanche and associated distal debris flow on Mount Cayley, British Columbia, Canada; implications for landslide hazard assessment on dissected volcanoes 29

Clay minerals
Process of slip-surface development and formation of slip-surface clay in landslides in Tertiary volcanic rocks, Japan 199

Debris flow
Dynamics of the 1984 rock avalanche and associated distal debris flow on Mount Cayley, British Columbia, Canada; implications for landslide hazard assessment on dissected volcanoes 29
Delta
Subsidence of the Thessaloniki (northern Greece) coastal plain, 1960–1999 243
Dilatancy
Development of damage and permeability in deforming rock salt 163
Disposal of radioactive waste
Moredalen — a canyon in the Fennoscandian Shield and its implication on site selection for radioactive waste disposal in south-eastern Sweden 99
DRD
In absurdum: long-term predictions and nuclear waste handling 75

Educational trends
Sixth Annual Report on the international status of engineering geology — Year 2000 Encompassing hydrogeology, environmental geology and the applied geosciences 1
Engineering geology
Sixth Annual Report on the international status of engineering geology — Year 2000 Encompassing hydrogeology, environmental geology and the applied geosciences 1
Ethics
Sixth Annual Report on the international status of engineering geology — Year 2000 Encompassing

hydrogeology, environmental geology and the applied geosciences 1
Excavation damaged zone
Seismic investigation of the Excavation damaged zone in Opalinus Clay 189
Expert testimony
Sixth Annual Report on the international status of engineering geology — Year 2000 Encompassing hydrogeology, environmental geology and the applied geosciences 1

Fission products
Migration of fissiogenic Sm in fractures at the natural fission reactor site of Bangombé and effects of neutron capture on remote samples 131
Fractures
Stress control of hydraulic conductivity in fracture-saturated Swedish bedrock 145

Geodesy
Subsidence of the Thessaloniki (northern Greece) coastal plain, 1960–1999 243
Geoenvironmental engineering
Sixth Annual Report on the international status of engineering geology — Year 2000 Encompassing hydrogeology, environmental geology and the applied geosciences 1
Geographical information systems (GIS)
GIS-based geo-environmental evaluation for urban land-use planning: a case study 257
Geologic constraints (hazards)
Sixth Annual Report on the international status of engineering geology — Year 2000 Encompassing hydrogeology, environmental geology and the applied geosciences 1
Geological engineering
Sixth Annual Report on the international status of engineering geology — Year 2000 Encompassing hydrogeology, environmental geology and the applied geosciences 1
Geological model
Geological and tectonic investigations in the former Morsleben salt mine (Germany) as a basis for the safety assessment of a radioactive waste repository 83
Geomechanical
Geomechanical stability and integrity of waste disposal mines in salt structures 155
Geomorphology
Moredalen — a canyon in the Fennoscandian Shield and its implication on site selection for radioactive waste disposal in south-eastern Sweden 99
Geotechnical
Geomechanical stability and integrity of waste disposal mines in salt structures 155
Gorleben
Implications of large-scale heterogeneities for hydraulic model studies at the potential site of a radioactive waste repository at Gorleben, Germany 119
GPR
Moredalen — a canyon in the Fennoscandian Shield and its implication on site selection for radioactive waste disposal in south-eastern Sweden 99
Ground water models
Implications of large-scale heterogeneities for hydraulic model studies at the potential site of a radioactive waste repository at Gorleben, Germany 119

Hauptanhydrit
Geological and tectonic investigations in the former Morsleben salt mine (Germany) as a basis for the safety assessment of a radioactive waste repository 83
Heterogeneity
Implications of large-scale heterogeneities for hydraulic model studies at the potential site of a radioactive waste repository at Gorleben, Germany 119
History
Sixth Annual Report on the international status of engineering geology — Year 2000 Encompassing hydrogeology, environmental geology and the applied geosciences 1
Hydraulic conductivity
Stress control of hydraulic conductivity in fracture-saturated Swedish bedrock 145
Hydrogeology
Sixth Annual Report on the international status of engineering geology — Year 2000 Encompassing hydrogeology, environmental geology and the applied geosciences 1

In situ measurements
Acoustic emission investigation of microcrack generation at geological boundaries 181
Integrity
Geomechanical stability and integrity of waste disposal mines in salt structures 155
Isotopes
Migration of fissiogenic Sm in fractures at the natural fission reactor site of Bangombé and effects of neutron capture on remote samples 131

KBS-3
In absurdum: long-term predictions and nuclear waste handling 75

Land subsidence
Subsidence of the Thessaloniki (northern Greece) coastal plain, 1960–1999 243
Land-use planning
GIS-based geo-environmental evaluation for urban land-use planning: a case study 257
Landslide
Process of slip-surface development and formation of slip-surface clay in landslides in Tertiary volcanic rocks, Japan 199
Landslides
Dynamics of the 1984 rock avalanche and associated distal debris flow on Mount Cayley, British Columbia, Canada; implications for landslide hazard assessment on dissected volcanoes 29
Liability
Sixth Annual Report on the international status of engineering geology — Year 2000 Encompassing hydrogeology, environmental geology and the applied geosciences 1
Liquefaction
In absurdum: long-term predictions and nuclear waste handling 75
Litigation
Sixth Annual Report on the international status of engineering geology — Year 2000 Encompassing hydrogeology, environmental geology and the applied geosciences 1

Microcracking
Acoustic emission investigation of microcrack generation at geological boundaries 181
Migration
Migration of fissiogenic Sm in fractures at the natural fission reactor site of Bangombé and effects of neutron capture on remote samples 131
Mixing
Migration of fissiogenic Sm in fractures at the natural fission reactor site of Bangombé and effects of neutron capture on remote samples 131
Modelling
Geomechanical stability and integrity of waste disposal mines in salt structures 155
Morsleben
Geological and tectonic investigations in the former Morsleben salt mine (Germany) as a basis for the safety assessment of a radioactive waste repository 83
Mudrocks
The value of rock mass classification systems for weak rock masses: a case example from Huntly, New Zealand 53

Natural analogue
Migration of fissiogenic Sm in fractures at the natural fission reactor site of Bangombé and effects of neutron capture on remote samples 131
Neotectonics
Moredalen — a canyon in the Fennoscandian Shield and its implication on site selection for radioactive waste disposal in south-eastern Sweden 99
Neutron capture
Migration of fissiogenic Sm in fractures at the natural fission reactor site of Bangombé and effects of neutron capture on remote samples 131
Nuclear waste handling
In absurdum: long-term predictions and nuclear waste handling 75

Oklo
Migration of fissiogenic Sm in fractures at the natural fission reactor site of Bangombé and effects of neutron capture on remote samples 131

Paleoseismicity
In absurdum: long-term predictions and nuclear waste handling 75
Permeability
Development of damage and permeability in deforming rock salt 163
Pore pressure
Development of damage and permeability in deforming rock salt 163
Pore water pressures
Failure mechanisms and pore water pressure conditions: analysis of a riverbank along the Arno River (Central Italy) 221
Porous media
Implications of large-scale heterogeneities for hydraulic model studies at the potential site of a radioactive waste repository at Gorleben, Germany 119
Pre-Zechstein
Geological and tectonic investigations in the former Morsleben salt mine (Germany) as a basis for the safety assessment of a radioactive waste repository 83
Profession
Sixth Annual Report on the international status of engineering geology — Year 2000 Encompassing hydrogeology, environmental geology and the applied geosciences 1
Professional practice
Sixth Annual Report on the international status of engineering geology — Year 2000 Encompassing hydrogeology, environmental geology and the applied geosciences 1
Pumping
Subsidence of the Thessaloniki (northern Greece) coastal plain, 1960–1999 243

Quantitative analysis
Dynamics of the 1984 rock avalanche and associated distal debris flow on Mount Cayley, British Columbia, Canada; implications for landslide hazard assessment on dissected volcanoes 29

REE
Migration of fissiogenic Sm in fractures at the natural fission reactor site of Bangombé and effects of neutron capture on remote samples 131
Repository
Geomechanical stability and integrity of waste disposal mines in salt structures 155
Resistivity measurements
Moredalen — a canyon in the Fennoscandian Shield and its implication on site selection for radioactive waste disposal in south-eastern Sweden 99
Riverbank
Failure mechanisms and pore water pressure conditions: analysis of a riverbank along the Arno River (Central Italy) 221
Riverbank stability analysis
Failure mechanisms and pore water pressure conditions: analysis of a riverbank along the Arno River (Central Italy) 221
Rock mass classification
The value of rock mass classification systems for weak rock masses: a case example from Huntly, New Zealand 53
Rock mechanics
Acoustic emission investigation of microcrack generation at geological boundaries 181
Rock salt
Acoustic emission investigation of microcrack generation at geological boundaries 181
Development of damage and permeability in deforming rock salt 163
Rockslides
Dynamics of the 1984 rock avalanche and associated distal debris flow on Mount Cayley, British Columbia, Canada; implications for landslide hazard assessment on dissected volcanoes 29

Safety
Geomechanical stability and integrity of waste disposal mines in salt structures 155
Salt table
Geological and tectonic investigations in the former Morsleben salt mine (Germany) as a basis for the safety assessment of a radioactive waste repository 83
Salt water
Implications of large-scale heterogeneities for hydraulic model studies at the potential site of a radioactive waste repository at Gorleben, Germany 119
Samarium
Migration of fissiogenic Sm in fractures at the natural fission reactor site of Bangombé and effects of neutron capture on remote samples 131
Sediment compaction
Subsidence of the Thessaloniki (northern Greece) coastal plain, 1960–1999 243
Seepage analysis
Failure mechanisms and pore water pressure conditions: analysis of a riverbank along the Arno River (Central Italy) 221
Seismic amplitudes
Seismic investigation of the Excavation damaged zone in Opalinus Clay 189
Seismic velocities
Seismic investigation of the Excavation damaged zone in Opalinus Clay 189
Sensitivity analysis
Implications of large-scale heterogeneities for hydraulic model studies at the potential site of a radioactive waste repository at Gorleben, Germany 119
Slip surface
Process of slip-surface development and formation of slip-surface clay in landslides in Tertiary volcanic rocks, Japan 199
Soft rock
The value of rock mass classification systems for weak rock masses: a case example from Huntly, New Zealand 53
Stability
Geomechanical stability and integrity of waste disposal mines in salt structures 155
Standards
Sixth Annual Report on the international status of engineering geology — Year 2000 Encompassing hydrogeology, environmental geology and the applied geosciences 1
Stress regimes
Stress control of hydraulic conductivity in fracture-saturated Swedish bedrock 145
Suitability assessment
GIS-based geo-environmental evaluation for urban land-use planning: a case study 257
Sweden
In absurdum: long-term predictions and nuclear waste handling 75
Stress control of hydraulic conductivity in fracture-saturated Swedish bedrock 145

Tradition
Sixth Annual Report on the international status of

engineering geology — Year 2000 Encompassing hydrogeology, environmental geology and the applied geosciences 1

Ultrasonic monitoring technique
Development of damage and permeability in deforming rock salt 163
Upper Tertiary system
Process of slip-surface development and formation of slip-surface clay in landslides in Tertiary volcanic rocks, Japan 199
Urban geology
GIS-based geo-environmental evaluation for urban land-use planning: a case study 257

Volcanic rocks
Dynamics of the 1984 rock avalanche and associated distal debris flow on Mount Cayley, British Columbia, Canada; implications for landslide hazard assessment on dissected volcanoes 29

Waste
Geomechanical stability and integrity of waste disposal mines in salt structures 155
Weak rock
The value of rock mass classification systems for weak rock masses: a case example from Huntly, New Zealand 53
